

Rain Barrel Purchase Program

The Greater Elkhart County Stormwater Partnership may reimburse homeowners up to \$50 per rain barrel toward the purchase of up to two (2) rain barrels per residential property. This is a onetime purchase option. Cases where additional rain barrels are needed will be reviewed on an individual basis, given the availability of funds. The program can reimburse either the purchase of pre-made rain barrels, or the cost of materials used to make rain barrels.

Applicants for this program will do the following:

1. Submit the application form below. Approval for reimbursement will be given on a first-come, first-served basis. The applicant will be notified whether they are approved or not.
2. Attend a one-hour rain barrel workshop offered by the Partnership. These will take place annually in the spring along with rain garden workshops. Non-Partnership workshops may be substituted with prior approval.
3. Submit receipts for rain barrels or materials purchased as well as a photo showing the installed rain barrel. This information may be submitted electronically.
